In a perfect world, the Ending Count is equal to the Beginning Count (A) plus Total Intake

(F) minus all Outcomes (R+V). -----> 2 71 73

If your reported Ending Count does not match these numbers, please go back through your data and be sure you didn't miss something (i.e., animals in foster, adoptions, transfers, etc.). If all animals have been accounted for and the reported Ending Count is different, please indicate in the comment section.

COMMENTS: There are more animals entered in their outgoing sections due to errors in record keeping. This will be rectified for 2011.

Section C: 21 from Buffalo City Humane, 24 from ECSPCA

COMMENTS: There are more animals in the outgoing sections than what was recorded in intake because TLC found cats in foster care they weren't accounting for before. This will be corrected in their 2011 data.
Section C: 124 cats from Buffalo City Animal Shelter (Transfers from CBAS include 4 kittens born from cats that were transferred while pregnant. CBAS does not count these 4 kittens as transfers); 83 cats from ECSPCA
