Instructions & Helpful Tips Shelter Comparison Page

Revised 10/31/2014

The default tab is Community Statistics. Click the Shelter Compare tab to explore shelter data for multiple shelters. There are three different ways to use the data displayed on the page:

1) Data is displayed by using the drop-down boxes at the top and the check boxes on the left:

Region	Income Ranges	Population Ranges	Intak	e Ranges	Shelter Type	Year

Click on the down arrow of the category and select the value you want, or select the check box(es) of the category. The drop-down boxes allow you to search by Region, Median Household Income, Human Population, Shelter Intake, Shelter Type and Year. The check boxes allow you to search by State, Community and Shelter. The term Shelter includes adoption guarantee organizations, animal control agencies and traditional shelters, whether they have a physical structure or not.

Note: As you are refining your search, it is possible to create an invalid combination. If this happens, no data displays. For example, if you uncheck "All" for Shelter, all States and Communities associated with those Shelters will be unchecked as well, causing no data to display:

Example: Let's change our search from all Shelters with 2012 data to all Shelters in Bernalillo County, NM with 2012 data:

- a) First uncheck "All" under Communities. You'll notice this causes no data to display since no Communities have been selected (and therefore no States or Shelters are available).
- b) Now, under Communities, check the box for Bernalillo County, NM. By default, "All" is checked under Shelters, therefore data for all Shelters in Bernalillo County display:

You can click on the row for any Shelter to see only their data:

Click it again, and the data reverts back.

Shift+Click and Ctrl(Command)+Click can be used to select multiple Shelters. To reset any filters back to the default, use the "Revert All" button 3 at the bottom of the page. (If you use the "refresh" button on your browser, you'll need to click back to the Shelter Compare tab.)

You can hover over the Graph to view the key data points for each Shelter:

Pop-Up Options (*Note: the following options only affect the Graph, not the other elements on the page.*):

Keep Only V Keep Only will remove all other Shelters from the Graph.

<u>Exclude</u> \times Exclude will remove that Shelter from the Graph.

<u>View Data</u> allows you to see the full dataset for that Shelter (in both Summary and Underlying formats).

3) The Data Chart:

If you click in the Data Chart anywhere along the row for a Shelter, the Graph will update to include only the selected Shelter:

Note: The data chart may scroll back to the top after selecting a shelter.

Click the shelter again, and the Graph reverts back and the row is no longer highlighted.

Shift+Click and Ctrl(Command)+Click can be used to select multiple Shelters. To revert back to the default, use the "Revert All" button \Im at the bottom of the page. (If you use the "refresh" button on your browser, you'll need to click back to the Shelter Compare tab.)

Hovering over a value in the Data Chart area will give you a pop-up with some additional details:

Pop-Up Options (Note: the following options only affect the Data Chart, not the Graph.):

Keep Only V Keep Only will remove all other Shelters from the Data Chart.

<u>Exclude</u> \times Exclude will remove that Shelter from the Data Chart.

<u>View Data</u> allows you to see the full dataset for that Shelter (in both Summary and Underlying formats).

Clicking on any of the Data Chart headings (except Shelter, Type, Community or Year) highlights that column and brings up a pop-up window with additional information and options:

Pop-Up Options (*Note: the following options only affect the Data Chart, not the other elements on the page.*):

Keep Only V Keep Only will remove all other data elements from the Data Chart, leaving just that data element (column) for each Shelter.

Exclude X Exclude will remove that data element (column) from the Data Chart.

Sort Ascending \cong allows you to display the data for that element (column) from lowest to highest Shelter.

Sort Descending 🖪 allows you to display the data for that element (column) from highest to lowest Shelter.

<u>View Data</u> allows you to see the full dataset for that element (column) in a new window (in both Summary and Underlying formats).

Additionally, you can download the full dataset when the Data Chart area is selected (click above Shelter, Type, Community or Year). We find the Data option, Underlying Data to be the most useful because it includes the full data set. Click the Export button at the bottom of the page and select Data:
