A six month data collection from the beginning of June 2020 to the end of November 2020 shows the following results:

A total of 123 pairs came into the shelter together.  
64 of those also left together!  
That is 52 % and they left with an average LOS of 8.2 days.

Out of the 81 stray pairs coming in 28.4 % were RTO together which told us that many stray pairs coming in together actually do come from the same home.

33 of the pairs (26.8 %) were deemed Bonded and they had a LOS of **13.2 days** (range 2 - 46 days)

Of the pairs that left separately the first dog had a LOS of 8.7 days.  
The second dog had a LOS of **16 days!**
