Schedule of Surveys Available to End Users

We created two basic types of surveys:

- 1) For foster pets
- 2) For adopted pets

The surveys between these groups are very similar; most differences are found in the specific advice given. Check out these example day 1 foster care surveys for [kittens](#), [cats](#) and [dogs](#).

Surveys are available to adopters or foster caregivers on specific days throughout the first month of care. We think this is the most critical time to create healthy, happy homes for pets – whether permanent or temporary!

The below calendars display when a caregiver will be prompted to submit a new survey.
