9

Priority	Criteria
High	Core to our mission, essential shelter service, essential to animal welfare
Medium	Important to our mission but not essential
Low	Could still support our mission without these services or could continue them in a different way

Risk to people	Criteria
Low	Can deliver service virtually or remotely, or only 1 or 2 points of contact that can be curbside
Medium	Service delivery is in-person and in-facility, but able to maintain distancing or very brief breaks in distancing, 1-on-1
High	Service delivery is in-person or in-facility (or other confined space), unable to maintain physical distancing, extended process/procedure, groups

Balancing
Priority
and Risk

A Framework for Reopening our Province

April 27, 2020

6/24/20

Ontario

Ontario's Response to COVID-19

Phase 1: Protect and Support

The government's primary focus is on protecting the health and well-being of individuals and families, supporting frontline health care workers, essential workers and businesses, and providing immediate support to protect people and jobs. This is demonstrated through the \$17-billion [Ontario's Action Plan: Responding to COVID-19](#) and ongoing government actions, such as increased pay for frontline workers during the pandemic.

Emergency orders put in place to protect people include: the closure of non-essential workplaces, outdoor amenities in parks, recreational areas and public places, as well as bars and restaurants; restrictions on social gatherings; and limiting staff from working in more than one retirement home, long-term care home or congregate care setting.

Phase 2: Restart

The government will take a careful, stage-by-stage approach to loosening emergency measures and reopening Ontario's economy. Public health and workplace safety will remain the top priority, while balancing the needs of people and businesses. Public health officials will carefully monitor each stage for two-to-four weeks, as they assess the evolution of the COVID-19 outbreak to determine if it is necessary to change course to maintain public health. The government will also continue to issue guidelines for workplace safety.

Stage 1

Stage 2

Stage 3

Phase 3: Recover

Ensuring the health and safety of the public and workers will continue to be a top priority as Ontario transitions to a "new normal." The government will partner with businesses and other sectors to lead Ontario's economic recovery. The focus will be on creating jobs and opportunity across the province, while working to restore long-term prosperity for the benefit of every individual and family in Ontario.

6/24/20

Guiding Assumptions

-  Pandemic will persist months to years, requiring:
 - Scaled-back on-site services
 - Contactless and remote service delivery
-  There will be advances and retreats
-  Infection risk is a product of exposure and time, highest in confined spaces
-  Human error will put people at risk without behaviour change and robust systems

This slide has a green background. On the left is a large green rectangle with the title 'Guiding Assumptions'. To the right are four white boxes, each containing an icon and text. The date '6/24/20' is in the bottom left corner.

14

Phase 1: Expansion. Expand existing services that have continued in a modified form. **Resumption.** Resume high priority/low risk services. **Contraction.** Stop and slow services as flare-ups occur.

Phase 2: Resumption. Resume services that have been stopped or seriously curtailed. Staged based on a balance between priority and risk. **Contraction.** Stop and slow services as flare-ups occur.

Phase 3: Resilience. Regroup, protect our staff and organization for the long term. **Re-imagine** ourselves through lessons learned during COVID-19.

6/24/20

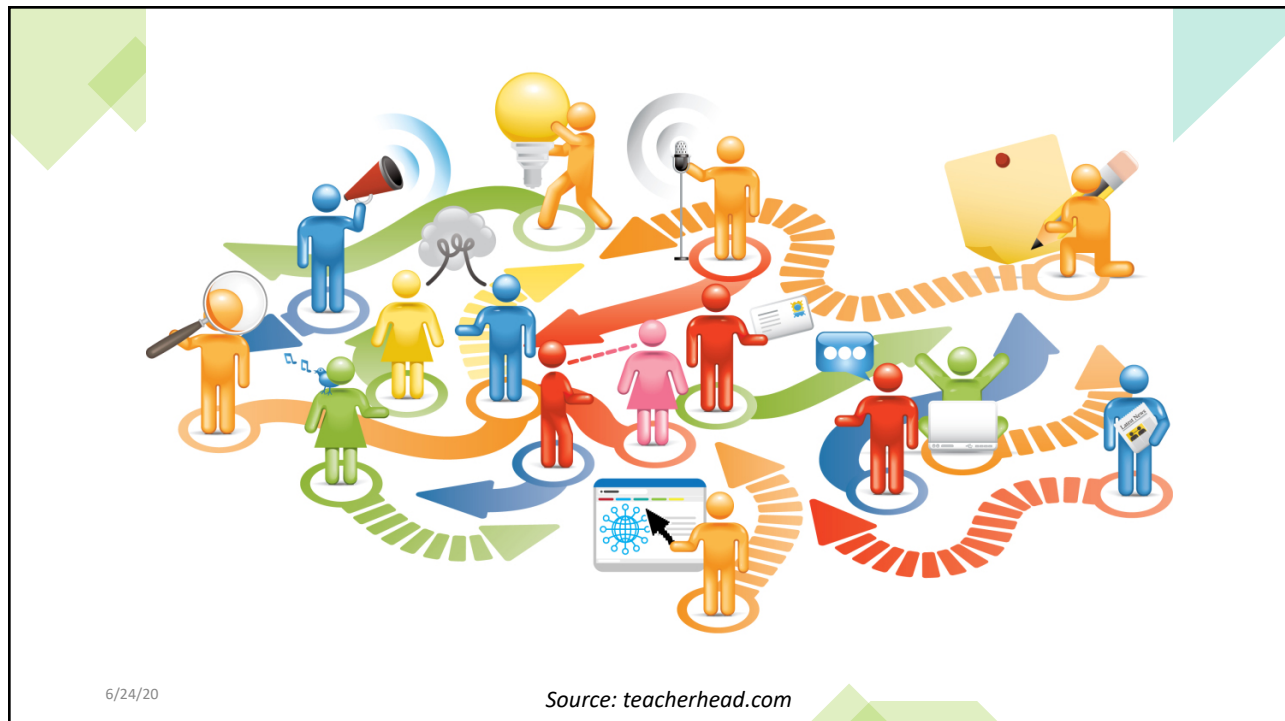

15

Overarching Process and Protocol Adjustments

- Physical adjustments
- Administrative adjustments
- Safe work practices
- PPE and infection control
- Automation and streamlining
- Documentation
- Training

MEDICAL DISPATCH

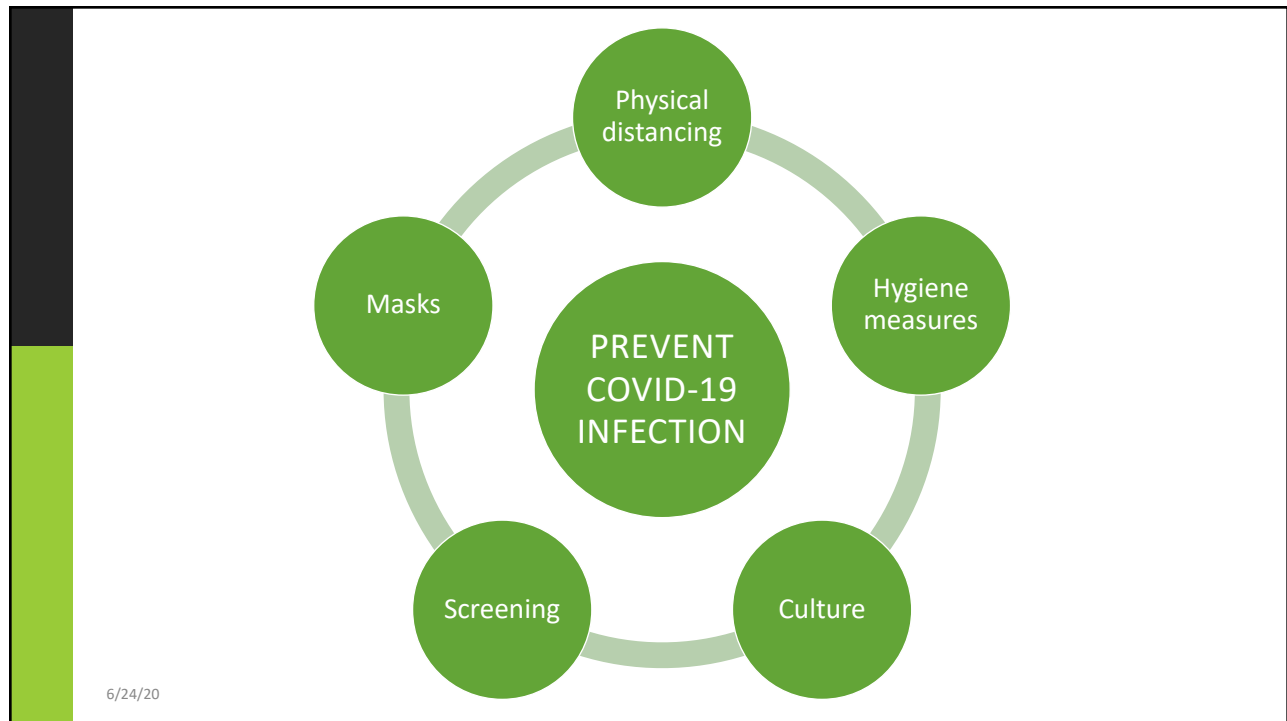

AMID THE CORONAVIRUS CRISIS, A REGIMEN FOR REENTRY

Health-care workers have been on the job throughout the pandemic. What can they teach us about the safest way to lift a lockdown?

Sam Ballard 6/6 1:27 PM

Hi Linda, I felt shy to say this in the group setting, but I just wanted to thank you for providing such an informative presentation on infection control. It really helped me to manage my expectations as far as the future is concerned - in both my professional and personal life. I have never really thought that the pandemic would magically be over, but I felt so lost about what could potentially occur moving forward. Your presentation really eased my feeling in the dark, and I just wanted to say thank you!

30

Mixed messages

- It's like the 'flu ... no, it's nothing like the 'flu
- Face masks won't help ... everyone should wear face masks
- Asymptomatic carriers don't spread infection ... oh, actually they do

31

Facing the Challenges Ahead

- Next Provincial re-opening stage
- THS services continue to open and expand
- Compliance fatigue
- Economic fall-out
- Community demand
- Resurgence
- And ... ?

6/24/20

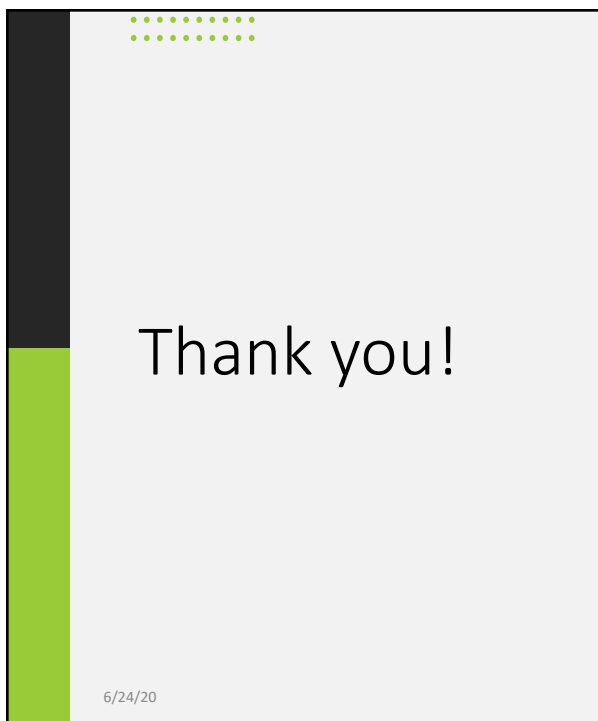

32

This Is A Process

- For now, it's our lives
- Some of it is our future
- One day at a time – with facts, hope and compassion

33

Thank you!

6/24/20

Drs. Julie Levy, Sandra Newbury, Scott Weese and the other incredible veterinarians and leaders

Dr. Karen Ward and Phil Nichols, THS leadership and staff

And my three shelter animals, who rescued me from a life without them
